Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:
<b>Step 2: Domain Choice</b> What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices: 1. Financial 2. Healthcare 3. IT	Financial
<b>Step 3: Model Evaluation Section</b> What was the response of the model to your domain-specific input in the <b>model_evaluation.ipynb</b> file?	The results are encouraging for aggressive investors >, and the company is now up 11% since the beginning of the year. In the first quarter, the company reported a 12% rise in revenue to \$11.8 billion, which was above the analysts' estimates of \$11.7 billion. The company'
<b>Step 4: Fine-Tuning Section</b> After fine-tuning the model, what was the response of the model to your domain-specific input in the <b>model_finetuning.ipynb</b> file?	The results are encouraging for aggressive investors > [{'generated_text': ".\nMost investors are content to let their stocks ride out the current market volatility. But for investors with a higher risk tolerance, the market's recent sell-off could be an opportunity to buy shares of companies that have been beaten down.\nFor instance, investors who"}]
