Introduction to Generative AI with AWS Project Documentation Report

Visit [UDACITY Introduction to Generative AI with AWS Project Documentation Report](#) to make a copy of this document.

Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:
Step 2: Domain Choice What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices: 1. Financial 2. Healthcare 3. IT	Financial
Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the model_evaluation.ipynb file?	The results are encouraging for aggressive investors > who are willing to accept a high level of risk, but the returns are not as high as they are for stocks. The stock market is a highly competitive market that is always changing. The best way to invest in stocks is to be informed about the market and the companies that you are investing in
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the model_finetuning.ipynb file?	The results are encouraging for aggressive investors > [{"generated_text": ".\nMost investors are content to let their stocks ride out the current market volatility. But for investors with a higher risk tolerance, the market's recent sell-off could be an opportunity to buy shares of companies that have been beaten down.\nFor instance, investors who"}]
